Adjunct Professor, University of Saskatchewan

The demographic trends of rural Ontario

•Conclusions

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Four of 14 Eastern Ontario census divisions (CDs) reported a population decline from 2012 to 2013
- Nine of 14 Eastern Ontario CDs had more deaths than births in 2013
- But 11 of 14 Eastern Ontario CDs had more in-migrants than out-migrants in 2013
- Regarding employment trends
- Ontario's non-metro employment has been flat since November, 2003
- In Eastern Ontario, employment in:
 - the Ottawa (and area) Economic Region has been flat since June, 2013; and
 - Employment has been flat in the Kingston-Pembroke Economic Region since September, 2005

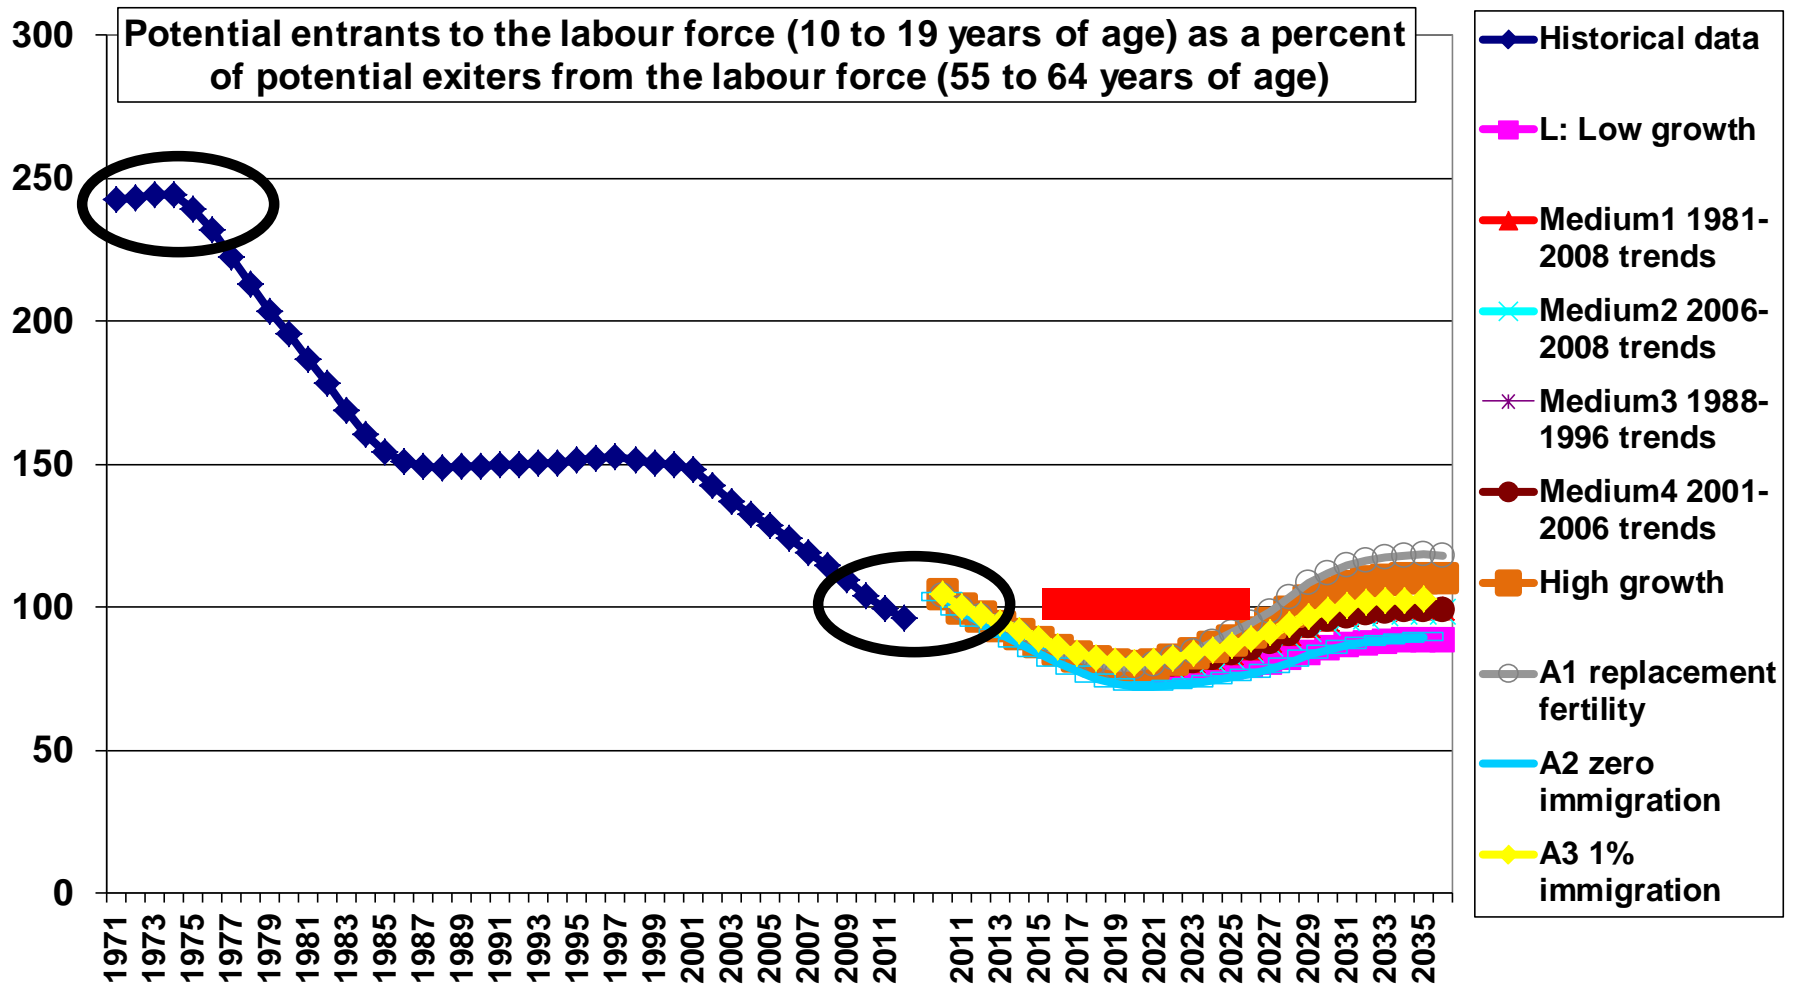

Rural Development is getting harder:

The demographic trends of rural Ontario

- **Fewer (potential) labour market entrants than (potential) retirees**
- **Components of population change:**
 - **Natural Balance (births minus deaths)**
 - **Voting with your feet**
 - **Net in-migration to / from elsewhere in Canada; or**
 - **International immigration**

Generally, migration is the largest component of population change across non-metro Ontario

Potential labour market shortage (regardless of projection scenario) up to 2025 due to less than 100 (potential) labour market entrants per 100 (potential) labour market retirees, ONTARIO

Source: Statistics Canada, Demographic Estimates and Projections, CANSIM Tables 051-0001 and 052-0005.

Demographic replacement of working age population fell below 100% in 2009, non-metro Ontario

* Reclassification is not an issue in this time series. These data have been tabulated within the 2006 boundaries of metro and non-metro. Source: Statistics Canada. **Annual Demographic Statistics**. CANSIM Table 051-0001 and 051-0046.

Census Divisions in Eastern Ontario ranked by demographic replacement of working age population, 2013

**Number of potential labour market entrants
(10 to 19 years of age) as a percent of the
number of potential labour market retirees
(55 to 64 years of age)**

Ottawa	95
Prescott & Russell	86
Frontenac	79
Stormont, Dundas & Glengarry	78
Hastings	77
Renfrew	75
Lennox & Addington	74
Leeds & Grenville	71

Rural Development is getting harder:

The demographic trends of rural Ontario

- **Fewer (potential) labour market entrants than (potential) retirees**
- **This implies labour market growth only from:**
 - **Net in-migration from elsewhere in Canada; or**
 - **International immigration**

The demographic trends of Eastern Ontario

- **Fewer (potential) labour market entrants than (potential) retirees**
- **First, trends in total population**
- **Then, components of population change:**
 - **Natural Balance (births minus deaths)**
 - **Voting with your feet**
 - **Net in-migration to / from elsewhere in Canada; or**
 - **International immigration**

Census Divisions in Eastern Ontario ranked by percent change in total population from 2012 to 2013

Census Division ID	Census Division name	Percent change in total population																
		1996 to 1997	1997 to 1998	1998 to 1999	1999 to 2000	2000 to 2001	2001 to 2002	2002 to 2003	2003 to 2004	2004 to 2005	2005 to 2006	2006 to 2007	2007 to 2008	2008 to 2009	2009 to 2010	2010 to 2011	2011 to 2012	2012 to 2013

The demographic trends of Eastern Ontario

- Fewer (potential) labour market entrants than (potential) retirees
- First, trends in total population
- Then, components of population change:
 - Natural Balance (births minus deaths)
 -  Voting with your feet
 - Prince Edward Census Division:
 - Largest % decline in total population in 2013
 - Largest % decline due to net migration in 2013
 - Here we look at net migration of youth for the three census divisions with the largest % decline in population in 2013:
 - Prince Edward -0.9%, Hastings -0.2%, Renfrew -0.1%

The demographic trends of rural Ontario

•Conclusions

- Rural development is getting harder - - - because there are now fewer potential labour market entrants than potential retirees
- Four of 14 Eastern Ontario census divisions (CDs) reported a population decline from 2012 to 2013
- Nine of 14 Eastern Ontario CDs had more deaths than births in 2013
- But 11 of 14 Eastern Ontario CDs had more in-migrants than out-migrants in 2013
- Regarding employment trends 
- Ontario's non-metro employment has been flat since November, 2003
- In Eastern Ontario, employment in:
 - the Ottawa (and area) Economic Region has been flat since June, 2013; and
 - Employment has been flat in the Kingston-Pembroke Economic Region since September, 2005

Ontario's non-metro employment was 1.24 million in June, 2014 -- the same level as November, 2003
